# AIR QUALITY CONFORMITY ANALYSIS AND DETERMINATION

## **Purpose**

The Butte County Association of Governments (BCAG) is the designated Metropolitan Planning Organization (MPO) in Butte County, California, and is responsible for regional transportation planning. The purpose of this conformity determination is to ensure that BCAG's plans and programs "conform" to all applicable federal air quality requirements.

The Clean Air Act Section 176(c) (42 U.S.C. 7506 (c)) and EPA's transportation conformity regulations (40 CFR 93.104(b) and (c)) require that each new regional transportation plan (RTP) and transportation improvement plan (TIP) be demonstrated to conform to the State Implementation Plan (SIP) before the RTP and FTIP are approved by the MPO or accepted by the U.S. Department of Transportation (DOT). This ensures that federally supported highway and transit project activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant national ambient air quality standards (NAAQS). Conformity currently applies under EPA's rules to areas that are designated non-attainment, and those re-designated to attainment after 1990 ("maintenance areas").

The region's last conformity determination and emissions analysis was adopted by the BCAG Board of Directors on December 12<sup>th</sup>, 2024, as part of the approval for the 2024 RTP. This action was then approved by the Federal Transit Authority (FTA) and Federal Highways Administration (FHWA) on March 5<sup>th</sup>, 2025.

This transportation air quality conformity determination and emissions analysis show that transportation projects programmed in the 2024 Butte County Regional Transportation Plan (RTP) and 2027 Federal Transportation Improvement Program (FTIP) are consistent with the applicable SIP.

## **Butte County's Air Quality Status**

### **Ozone**

Effective July 20, 2012, Butte County was designated marginal nonattainment under EPA's federal 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS).

Effective August 3, 2018, Butte County was designated marginal nonattainment under EPA's federal 2015 8-hour ozone NAAQS.

Because of these designations, transportation projects occurring within Butte County are subject to an air quality conformity determination for the ozone precursors Reactive Organic Gases (ROG) and Oxides of Nitrogen (NOx).

Previously, under EPA's 1-hour ozone rule, Butte County was designated "non-attainment – transitional" (Section 185A) and was not required to develop an attainment SIP with an emissions budget.

Since no emissions budget exists from a prior SIP submittal that has been found adequate by EPA, or was part of an approved SIP, an interim conformity test applies. To make a conformity determination under the 2008 federal 8-hour standard, future emissions of ROG and NOx must be no greater than 2011 emissions levels, or the build/no-build test must be passed. Similarly, to make a conformity determination under the 2015 federal 8-hour standard, future emissions of ROG and NOx must be no greater than 2017 emissions levels, or the build/no-build test must be passed.

### Carbon Monoxide

As a result of a 1998 SIP revision approved by EPA, Butte County (Chico Urbanized area) was re-designated from non-attainment to attainment with a Maintenance SIP for carbon monoxide (CO). In 2007, the 1998 Maintenance SIP was updated by ARB and approved by EPA for the second decade of the maintenance period. In the BCAG area, transportation conformity requirements for CO ended June 1, 2018.

### Fine Particulate Matter (PM2.5)

As a result of a 2018 SIP revision approved by EPA, Butte County (Chico Urbanized area) was re-designated from non-attainment to attainment with a Maintenance SIP for fine particulate matter (PM2.5) under the EPA 2006 24-hour PM2.5 NAAQS.

As part of EPA's final action, the determination was made that contributions from motor vehicle emissions in the non-attainment area are insignificant. As a result of this finding, BCAG is no longer required to perform regional emissions analyses for either directly emitted PM2.5 or nitrogen oxides as part of future PM2.5 conformity determinations for the 2006 24-hour PM2.5 NAAQS for the Chico area.

## **Conformity Criteria and Procedures**

### **Planning Assumptions**

The emissions estimates developed for this conformity determination were based on the latest planning assumptions available for Butte County in accordance with 40 CFR 93.110 of the Federal Conformity Rule. BCAG has the responsibility to develop estimates and forecasts of population, employment, travel, and congestion for the Regional Transportation Plan (RTP) and for preparation of the required air quality conformity emissions analysis and determination. Forecasts for population and employment are incorporated into the countywide transportation model database used by BCAG.

The initial modeling for the 2024 RTP conformity analysis began in February 2023. An update of the BCAG travel model was completed in August 2024 and the population, housing, and employment projections identified in BCAGs [Butte County Long-Term Regional Growth Forecasts 2022-2045](#) are the same as those used in the updated model. The model was validated in 2024 for the 2022 base year and utilizes Cube modeling software. The latest planning assumptions used in the transportation model validation and conformity analysis are summarized in Table 1.

**Table 1**  
**Summary of Latest Planning Assumptions for the BCAG Conformity Analysis**  
**40 CFR 93.110**

| Assumption              | Year and Source of Data<br>(MPO Action)                                                                                                                                                                                    | Modeling                                                                                                                      | Next Scheduled Update                                                                                                                         |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Population              | Base Year: 2022 CA DOF<br>Projections: based on BCAG's <i>Butte County Long-Term Regional Growth Forecasts 2022-2045</i> , prepared March 2023. Modeling utilizes "medium scenario" included in the plan.                  | Included in developing latest BCAG regional transportation model and land use allocations for the years 2025, 2035, and 2045. | Next update to population forecasts is anticipated to be adopted December 2028.                                                               |
| Employment              | Base Year: 2022 CA EDD<br>Projections: based on BCAG's <i>Butte County Long-Term Regional Growth Forecasts 2022-2045</i> , prepared March 2023. Modeling utilizes "medium scenario" included in the plan.                  | Included in developing latest BCAG regional transportation model and land use allocations for the years 2025, 2035, and 2045. | Next update to employment forecasts is anticipated to be adopted December 2028.                                                               |
| Traffic Counts          | Base Year: 2022<br>The transportation model was validated to the base year using year 2022 traffic counts collected by Caltrans, local jurisdictions, and BCAG.                                                            | Latest BCAG regional transportation model was validated using counts.                                                         | Traffic counts are updated every 4 years, depending upon availability of funding.                                                             |
| Vehicle Miles of Travel | The transportation model was validated in 2024 to the 2022 base year.                                                                                                                                                      | Cube is the model used to estimate VMT for the BCAG regional transportation model.                                            | VMT is an output of the transportation model; VMT is affected by the RTP/FTIP project updates and is included in each new emissions analysis. |
| Speeds                  | The transportation model uses industry-standard volume delay curves. Baseline speeds are set according to posted and surveyed speeds and the speeds are sensitive to the amount of traffic on the roadway segments.        | Cube and EMFAC 2021 (v1.0.2)                                                                                                  | Speed data is updated every 4 years, dependent upon availability of funding.                                                                  |
| Vehicle Registration    | EMFAC 2021 was the most recent federally approved model for use in California conformity analysis when the 2024 RTP was developed. Vehicle registration is included by ARB in the model and cannot be updated by the user. | EMFAC 2021 (v1.0.2) with November 21, 2025, adjustment factors and HD I/M Regulation adjustment factors (2/6/2026).           | EMFAC 2021 will be used for any analysis on or after November 15, 2024                                                                        |
| Transit                 | Base Year: Butte Regional Transit (2022) and Butte County Transit and Non-Motorized Plan (2022)<br>Projections: Butte County Transit and Non-Motorized Plan (2022).                                                        | Cube                                                                                                                          | TBD                                                                                                                                           |

### BCAG Transportation Model

The transportation conformity rule (TCR) section 93.122(b) requires the use of network-based transportation models for serious, severe, and extreme ozone non-attainment areas if their metropolitan planning region contains an urbanized population of more than 200,000. Butte County does not contain an urbanized area of that size, nor does it have an ozone classification of serious or greater. However, BCAG has used a

network-based model in the past and has continued with the recent transportation model update. The BCAG transportation model meets the requirements of TCR 93.122.

The BCAG transportation model is consistent in form and function with the standard traffic forecasting models used in the transportation planning profession. The model is a four-step travel demand forecasting model consisting of Trip Generation, Trip Distribution, Mode Choice, and Trip Assignment and produces forecasts for daily, AM peak hour, and PM peak hour conditions. In addition, the model is calibrated to traffic counts for what is conventionally termed a “typical workday”, which is defined as a Tuesday, Wednesday, or Thursday during a week with no holidays and when schools are in session. The model utilizes Cube software, which is consistent with many of the models used by local jurisdictions in California and Caltrans.

### *Traffic Counts*

The transportation model was validated to the 2022 base year using traffic count data collected from several sources including Caltrans, Butte County, and BCAG.

### *Speeds*

The transportation model uses industry-standard volume delay curves as part of the traffic modeling process. The baseline speeds in the model are set according to the posted speeds and checked with observed speed data. Speeds are sensitive to the amount of traffic on the roadway segments. For example, as roadway segment volumes increase, the link speed decreases

Speed distributions were updated in EMFAC 2021, using methodology approved by ARB and with information from the transportation model.

### *Transit*

The BCAG transportation model now includes a transit component in the mode choice model which provides BCAG the ability to forecast transit mode share. Base year ridership was taken from year 2022 data provided by Butte Regional Transit and included in the transportation model along with routing and service frequency. Forecast year information was updated based on the latest forecasted transit routes included in the Butte County Transit and Non-Motorized Plan. Overall, transit mode share is forecasted to increase from 1.71% (2022) to 4.85% (2045) during the 2024 RTP planning period. It is also assumed that transit fares will remain constant in 2022 dollars over the 21-year planning period of the analysis.

## *Land Use*

The 2022 base year land use data for the model was developed utilizing BCAG's existing land use database developed in 2010 and maintained annually. The existing land use database was developed utilizing the Butte County Assessor's database which was verified with the cities, town, and county's existing land use information along with aerial photos, field observations, and vendor supplied business data.

The transportation model's future year land use data was developed with the assistance of the local jurisdictions planning staff and is based on land use information from the areas local land use plans, planned development, reasonable assumptions regarding infill and redevelopment, regional growth forecasts, and a review of development attractions (i.e., motorized and non-motorized transportation networks, existing development, service areas, etc.) and discouragements (i.e., resource areas and farmland, public lands, areas exceeding 25% slope, etc.). The general plan and specific plan development activities occurring in the county by the local jurisdictions are reflected in the future land use assumptions, which are generally representative of the best available information as of June 30<sup>th</sup>, 2023.

The transportation model contains 914 transportation analysis zones (TAZ's) within which land use data is summarized into the following 17 categories:

- Single-Family Residential (dwelling units – du)
- Multi-Family Residential (du)
- Mobile Home Residential (du)
- Neighborhood-Serving Retail (1,000 square feet – ksf)
- Region Serving Retail (ksf)
- Industrial (ksf)
- Office (ksf)
- Medical Office (ksf)
- Hospital (ksf)
- Public-Quasi Public (ksf)
- Hotels (rooms)
- University (students)
- Community College (students)
- K-12 Schools (students)
- Park (acres)
- Special Generator for Casino (slots)
- External Trip Distribution for Casino (trips)

## *Road Network*

The roadway network is based on the BCAG centerline road network and contains all existing and future roadway classifications of “local” and above which were developed

considering local jurisdictions circulation elements of their general plans and Caltrans California Road System (CRS) maps. The road network includes all regionally significant roadways.

Future road networks prepared for emissions analysis include all regionally significant and non-regionally significant federal, state, and locally funded, and non-exempt projects. Tables 3-5 contain these non-exempt projects sorted by conformity analysis year. In addition, all projects within the RTP/FTIP that are exempt from conformity requirements have been documented (see Appendix A).

### *Validation/Calibration*

The BCAG transportation model was validated to daily, AM and PM peak hour conditions. The model is reasonably sensitive to auto operating costs. Detailed validation summary reports are available upon request. In general, the transportation model generates results that exceed the screenline and link volume validation standards established in Caltrans *Travel Forecasting Guidelines*, November 1992, and *Travel Model Improvement Program (TMIP) Model Validation and Reasonableness Checking Manual*, February 1997 for daily, AM and PM peak hour conditions. In addition, the model meets the specific static validation criteria contained in the *2024 California Regional Transportation Plan Guidelines*.

In addition to static tests, the BCAG TDF model's estimate of daily vehicle miles of travel (VMT) for Butte County was compared to independent estimates from the Highway Performance Monitoring System (HPMS).

### BCAG Consultation and Planning Process

BCAG has followed the latest Final Transportation Conformity Rule in preparing the air quality conformity determination for the 2024 RTP and 2027 FTIP. The Final Conformity Rule requires that Regional Transportation Planning Agencies (RTPAs) develop an Air Quality Conformity Element to identify the procedures and criteria for developing air quality conformity determinations for their respective regions.

As the Regional Transportation Planning Agency (RTPA) for Butte County, BCAG has established a broad planning process and partnership with federal, state, and local governments, the Butte County Air Quality Management District, and the public.

This planning process and partnership includes consultation through our Transportation Advisory Committees that is comprised of representatives from all levels of local government, state and federal agencies, the air district, the public, and other affected agencies and interested citizens in Butte County. The Transportation Advisory Committee typically meets monthly as needed to review and provide input into all BCAG planning activities. The technical issues are resolved at this level, and

recommendations are made to the BCAG Board of Directors.

### Specific Consultation

The transportation conformity document is required to be developed in consultation with BCAG's planning partners, and the opportunity must be provided for public review.

During the development of the air quality conformity analysis and determination, BCAG consulted with the **Interagency Consultation Review (ICR)** group which reviewed and concurred with the emissions inventory, conformity analysis years, latest planning assumptions, project exemptions, as well as the methodology used to generate the emissions inventory. The ICR includes representatives from the Federal Highway Administration (FHWA), Environmental Protection Agency (EPA), Caltrans, Butte County Air Quality Management District and BCAG. The Federal Transit Administration was invited to participate as well. The latest interagency consultation process began on July 23, 2026, with a meeting request to review the draft document.

BCAG staff provided a 30-day public review and comment period in compliance with BCAG's adopted Public Participation Plan (PPP). Legal notices were posted in local newspapers, and the conformity document was made available at local public libraries and on BCAG's website. The Air Quality Conformity Analysis and Determination were circulated among staff from Federal Highway Administration (FHWA), Environmental Protection Agency (EPA), Federal Transit Agency (FTA), and Caltrans. Appendices C and D contain copies of public notices and responses to public comments.

### Financial Constraint

The 2027 FTIP and 2024 RTP have been financially constrained in accordance with the requirements of 40 CFR 93.108 and is consistent with the U.S. DOT metropolitan planning regulations (23 CFR Part 450). See Financial Element of 2024 RTP for further details.

### Transportation Control Measures

There are no TCMs in the PM<sub>2.5</sub> SIP and there is no approved ozone SIP applicable to Butte County. Because there are no TCMs in an approved SIP for Butte County, Butte County currently has no TCMs in place and therefore timely TCM implementation requirements do not apply.

### Vehicle Registrations

Butte County Association of Governments does not estimate vehicle registrations, age distributions or fleet mix. Rather, current forecasted estimates for these data are developed by the California Air Resources Board (CARB) and included in the EMFAC 2021 model. Effective November 15, 2022, EMFAC 2021 was approved by the federal government for use in California conformity analysis. Vehicle registrations, age distribution and fleet mix are developed and included in the model by CARB and cannot be updated by the user.

### Modeling Documentation

A complete description of BCAG's transportation model is available upon request. BCAG's transportation model, which was used to develop transportation-related emissions for the Butte County non-attainment and maintenance areas, currently meets all requirements set forth in the March 2012 Federal Register.

### Emissions Models

To determine emissions associated with the implementation of the 2024 RTP and 2027 FTIP, the most recent, federally approved, emissions model is used. To develop the air quality conformity analysis, two types of models were used: the BCAG transportation model and EMFAC.

The BCAG transportation model was used to prepare the traffic model runs for the necessary analysis years. The BCAG transportation model produced forecasts of vehicle miles traveled (VMT), trip ends, speed distributions, lane miles, and other travel related data required for the emission models.

BCAG used the most current federally approved emissions model to prepare the regional emissions analysis. At the time this document was updated for the 2027 FTIP, July 2026, EMFAC 2021 was the latest federally approved model in California. In addition, two off-model adjustments were included to: 1) remove the estimated emissions benefits attributed to California's Advanced Clean Trucks (ACT), Zero-Emission Airport Shuttle, Heavy-Duty Vehicle and Engine Emission Warranty and Maintenance Provisions (Warranty Phase 1), and Heavy-Duty Omnibus (Omnibus) regulations from EMFAC2021, as approved by US EPA on November 21, 2025, and; 2) account for California's Heavy-Duty Vehicle Inspection and Maintenance Program (HD I/M Program), as approved by the US EPA on February 6, 2026.

### Analysis Years

The regional emissions analysis begins with the 2011 and 2017 baseline analysis years for Ozone (40 CFR 93.119(e)(4)). The year 2025 is included as a milestone year and

meets the requirement of not exceeding five years from the year the RTP/FTIP conformity determination was prepared (2024 & 2026). In addition, the milestone year of 2035 is included since analysis is required between years and cannot be more than 10 years apart. The last year included in the emissions analysis is the long-range RTP horizon year of 2045.

A summary of the analysis years is indicated below:

- 2011 – Ozone (2008) NAAQS baseline year
- 2017 – Ozone (2015) NAAQS baseline year
- 2025 – Milestone year no greater than five years from the preparation of the RTP and FTIP conformity determination (2024 & 2026),
- 2035 – Milestone year no more than 10 years from last analysis year
- 2045 – Horizon year of BCAG's long-range RTP

### Projects Included in the Regional Emissions Analysis

The 2024 RTP and 2027 FTIP include all federal and non-federal regionally significant projects expected to occur in the Butte County ozone non-attainment area. Projects included in this emissions analysis include all relevant projects contained in the 2024 RTP and 2027 FTIP that are assumed funded. The projects are those receiving federal transportation dollars as well as those that have been determined to be regionally significant regardless of funding type. All capacity projects have been included in this conformity analysis as required by the Transportation Conformity Rule. The funding sources for which the specific list of projects is derived are listed in Table 2 below.

**Table 2**  
**RTP and FTIP Project Funding Sources**

|       |                                                               |
|-------|---------------------------------------------------------------|
| ATP   | Active Transportation Program                                 |
| CMAQ  | Congestion Mitigation and Air Quality                         |
| FTA   | Federal Transit Administration (5307, 5309, 5310, 5311, 5339) |
| HBP   | Highway Bridge Program                                        |
| HSIP  | Highway Safety Improvement Program                            |
| IIP   | Interregional Improvement Program (Derived from STIP)         |
| Local | Local Agency Funds (City/County funds)                        |
| RIP   | Regional Improvement Program (Derived from STIP)              |
| SHOPP | State Highway Operations and Protection Program               |
| SRTS  | Safe Routes to School                                         |

The specific capacity projects included in each analysis year in the emissions analysis are included below in Tables 3, 4, and 5. It is important to note that the 2025 model includes all projects listed in Table 3, the 2035 model includes all projects listed in Tables 3 and 4, and the 2045 model includes all projects listed in Tables 3, 4, and 5.

**Table 3**  
**Capacity Projects Included in 2025 Emissions Analysis**

| <b>Jurisdiction</b> | <b>Roadway</b> | <b>Segment</b>                                 | <b>Proposed Improvement</b> |
|---------------------|----------------|------------------------------------------------|-----------------------------|
| Butte County        | SR 70          | Lower Honcut Rd to Butte County Line           | Widen to 4 lanes            |
| Chico               | Cohasset Rd    | Airport Blvd to Eaton Rd                       | Widen to 4 lanes            |
| Chico               | Yosemite Dr    | Native Oak Dr to Humboldt Rd                   | Construct 2 lane roadway    |

### Eight-hour Ozone Standards

### *2008 Ozone NAAQS*

Effective July 20, 2012, Butte County is designated marginal nonattainment under EPA's federal 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS).

The conformity test to be used to demonstrate conformity to the 2008 8-hour federal ozone NAAQS is the "no-greater-than 2011" test whereby future emissions must be less than or equal to those emission present in the 2011 base year.

#### *2015 Ozone NAAQS*

Effective August 3, 2018, Butte County is designated marginal nonattainment under EPA's federal 2015 8-hour ozone National Ambient Air Quality Standards (NAAQS).

The conformity test to be used to demonstrate conformity to the 2015 8-hour federal ozone NAAQS is the "no-greater-than 2017" test whereby future emissions must be less than or equal to those emission present in the 2017 base year.

### **Regional Emissions Analysis and Forecast**

The regional emissions analysis and forecast for ozone precursors have been summarized in the following tables. The summary of emissions forecasts is derived from outputs of the EMFAC 2021 model, including off-model adjustments. These tables show comparisons of:

ROG: Reactive Organic Gases as an ozone precursor

NOx: Oxides of Nitrogen as an ozone precursor

Ozone 8-hour Standard Tests – “no-greater-than- 2011” and “no-greater-than- 2017”

**Air Quality Conformity Determination**

The results from the 2027 FTIP and 2024 RTP emissions analysis show that current and future emissions of the ozone precursors ROG and NOx will be no greater than the 2011 and 2017 base year emissions levels. Thus, Butte County, in accordance with the Transportation Conformity Rule requirements applicable to Butte County (§51.464 and §51.436 – 51.440), has satisfied the “no-greater-than-2011” test for the 2008 8-hour federal ozone NAAQS and the “no-greater-than-2017” test for the 2015 8-hour federal ozone NAAQS. **Based on this analysis, the 2024 Regional Transportation Plan (RTP) and 2027 Federal Transportation Improvement Program (FTIP) conform to the applicable State Implementation Plan (SIP) and all applicable sections of the EPA’s Transportation Conformity Rule.**

The scope of this new project is to install 1 Std 9-A, medians, install/repair sidewalk, sidelights, and active advanced warning elements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Section 93.126                                     | Table 2 Exempt Projects                                                                       | Safety               | Railroad/Highway Crossings                                                                 |            |
| Chico    | 202-0000-0223      | SR 99 Southgate Interchange Feasibility Study                                       | At the State Route 99 at Southgate Intersection in the City of Chico. Project is to develop planning and technical studies only for a future interchange with local connections. Funding is for Preliminary Engineering component to determine if project is feasible.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Section 93.126                                     | Table 2 Exempt Projects                                                                       | Other                | Planning and Technical Studies                                                             |            |
| Chico    | CH-BIKE-ATP-2020-1 | Little Chico Creek Pedestrian / Bicycle Bridge Connection at Community Park Project | Just south of Humboldt Ave, west of State Route 99. Project entails new bridge connector over Little Chico Creek into the north side of 20th Street Park.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Section 93.126                                     | Table 2 Exempt Projects                                                                       | Air Quality          | Bicycle and Pedestrian Facilities                                                          |            |
| Chico    | 202-0000-0117      | SR 99 Corridor Bikeway Phase 5 - 20th Street Crossing                               | SR 99 Corridor Bikeway Project Phase 5 completes the gap adjacent to SR 99 from Chico Mall across 20th Street to the north end of Business Lane. This project is to complete the technical studies only thru preliminary engineering.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Section 93.126                                     | Table 2 Exempt Projects                                                                       | Air Quality          | Bicycle and Pedestrian Facilities                                                          |            |
| Chico    | Planned            | Whittmeier Dr Class 1 (Bikeway 99 connector)                                        | From SR 99 Phase 4 end to Forest Ave and Talbert. Class 2 bike facility (0.18 miles)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Section 93.126                                     | Table 2 Exempt Projects                                                                       | Air Quality          | Bicycle and Pedestrian Facilities                                                          |            |
| Chico    | 202-0000-0194      | Esplanade Corridor Safety and Accessibility Improvement Project                     | The scope of the project includes various non-motorized "complete streets improvements along the Esplanade Corridor from W. 11th Avenue to Memorial Avenue. Improvements are as follows: 1) ADA improvements (ramps, sidewalk gap closures); 2) Pedestrian refuge islands at all signalized and non-signalized intersections both at center islands and islands separating travel lanes from frontage roads; 3) Traffic signal equipment upgrades (pedestrian countdown signal heads with adequate time to cross Esplanade); 4) Consistent pavement markings and signage ("Keep Clear" pavement delineations with either green pavement and/or slightly raised colored concrete option); 5) Traffic signal timing plan with pedestrian push button and vehicle detection (use detection based system during peak times, use existing 28mph progression during non-peak times). | Section 93.126<br>Section 93.126<br>Section 93.128 | Table 2 Exempt Projects<br>Table 2 Exempt Projects<br>Traffic signal synchronization projects | Air Quality<br>Other | Bicycle/Pedestrian Facilities and Pavement Markings<br>Directional and informational signs |            |
| Chico    | 202-0000-0226      | Hegan Lane Business Park Access Improvements                                        | In the City of Chico, along the portions of Hegan Ln, Midway, and Park Ave in the Hegan Lane Business Park area. Operational and safety improvements to the Hegan Lane Business Park District. Phase 1 includes the synchronized construction of four roundabouts at the intersections of Park Ave and Midway, Park Ave and Fair St, Hegan Ln and Midway, and Hegan Ln and Otterson Dr. Includes bike and pedestrian improvements                                                                                                                                                                                                                                                                                                                                                                                                                                              | Section 93.127                                     | Table 3 Projects Exempt from Regional Emissions Analyses                                      |                      | Intersection channelization projects.                                                      |            |

## APPENDIX B

### Non-Exempt Regionally Significant Project List - 2024 RTP/SCS & 2027 FTIP

| Jurisdiction | TITLE                                                  | PROJECT DESCRIPTION                                                                     | Emissions Analysis Year |      |      |
|--------------|--------------------------------------------------------|-----------------------------------------------------------------------------------------|-------------------------|------|------|
|              |                                                        |                                                                                         | 2025                    | 2035 | 2045 |
| Butte County | SR 70 Widening (Lower Honcut Rd to Butte/Yuba Co line) | Widen SR 70 from 2 to 4 lanes from Lower Honcut Rd to Butte/Yuba Co line                | X                       | X    | X    |
| Chico        | Cohasset Rd Widening (Airport Blvd to Eaton Rd)        | Widen Cohasset Rd from 2 to 4 lanes from Airport Blvd to Eaton Rd                       | X                       | X    | X    |
| Chico        | Yosemite Dr extension (Native Oak Dr to Humboldt Rd)   | Construct 2 lane roadway for extension of Yosemite Dr from Native Oak Dr to Humboldt Rd | X                       | X    | X    |
| Chico        | Bruce Rd Widening (Skyway to SR 32)                    | Widen Bruce Rd from 2 to 4 lanes from Skyway to SR 32                                   | X                       | X    | X    |
|              |                                                        | Widen Bruce Rd Bridge from 2 to 4 lanes @ Little Chico Creek                            | X                       | X    | X    |
| Paradise     | Black Olive Dr Park & Ride                             | New Park & Ride Facility on Black Olive Dr between Pearson Rd and Burch St              | X                       | X    | X    |
| Butte County | Central House Rd Bridge Widening (at Wyman Ravine)     | Widen Central House Rd Bridge from 1 to 2 lanes at Wyman Ravine                         |                         | X    | X    |
| Chico        | Guynn Rd Bridge Widening (at Lindo Channel)            | Widen Guynn Rd Bridge from 1 to 2 lanes at Lindo Channel                                |                         | X    | X    |
| Chico        | Commerce Ct Extension (Ivy St to Park Ave)             | Construct 2 lane roadway connecting Ivy St to Park Ave                                  |                         | X    | X    |
| Chico        | Esplanade Widening (Eaton Rd to Nord Hwy)              | Widen Esplanade from 2 to 4 lanes from Eaton Rd to Nord Hwy                             |                         | X    | X    |
| Chico        | Notre Dame Extension (bridge @ Little Chico Creek)     | Construct 2 lane bridge over Little Chico Creek                                         |                         | X    | X    |
| Chico        | Eaton Rd Widening (Esplanade to SR 99)                 | Widen Eaton Rd from 2 to 4 lanes from Esplanade to State Route 99                       |                         | X    | X    |
| Chico        | Fair St Lane Reduction (E. Park Ave to 20th St)        | Reduce Fair St from 4 to 2 lanes from E. Park Ave to 20th St                            |                         | X    | X    |
| Paradise     | Roe Rd Extension (SR 191 to Scottwood Rd)              | Construct 2 lane roadway for extension of Roe Rd from SR 191 to Scottwood Rd            |                         | X    | X    |
| Paradise     | Roe Rd Extension (Pentz Rd to S. Libby Rd)             | Construct 2 lane roadway for extension of Roe Rd from Pentz Rd to South Libby Rd        |                         | X    | X    |
| Paradise     | Roe Rd Extension (S. Libby Rd to Clark Rd)             | Construct 2 lane roadway for extension of Roe Rd from South Libby Rd to Clark Rd        |                         | X    | X    |
| Chico        | Eaton Rd Widening (Hicks Ln to Cohasset Rd)            | Widen Eaton Rd from 2 to 4 lanes from Hicks Ln to Cohasset Rd                           |                         |      | X    |
| Chico        | E. 20th St Widening (Forest Ave to Bruce Rd)           | Widen E. 20th St from 2 to 4 lanes from Notre Dame Blvd to Bruce Rd                     |                         |      | X    |
| Chico        | Eaton Rd Widening (Ceonothus to Marigold Ave)          | Widen Eaton Rd from 2 to 4 lanes from Ceonothus to Marigold Ave                         |                         |      | X    |
| Chico        | Eaton Rd Widening (Cohasset Rd to Lassen Ave)          | Widen Eaton Rd from 2 to 4 lanes from Cohasset Rd to Lassen Ave                         |                         |      | X    |
| Chico        | Eaton Rd Widening (Marigold Ave to Lance Terr)         | Widen Eaton Rd from 2 to 4 lanes from Marigold Ave to Lance Terr                        |                         |      | X    |
| Chico        | Midway Widening (Hegan Ln to E. Park Ave)              | Widen Midway from 2 to 4 lanes from Hegan Ln to E. Park Ave                             |                         |      | X    |
| Chico        | SR 32 Widening (El Monte Ave to Bruce Rd)              | Widen SR 32 from 2 to 4 lanes from El Monte Ave to Bruce Rd                             |                         |      | X    |
| Chico        | SR 32 Widening (Bruce Rd to Yosemite Dr)               | Widen SR 32 from 2 to 4 lanes from Bruce Rd to Yosemite Dr                              |                         |      | X    |
| Chico        | MLK Blvd Widening (E. Park Ave to 20th St)             | Widen MLK Blvd from 2 to 4 lanes from E. Park Ave to 20th St                            |                         |      | X    |
| Chico        | SR 99 on-ramp at Cohasset Rd                           | Improve interchange at SR 99 and Cohasset Rd by adding southbound direct on-ramp        |                         |      | X    |
| Chico        | SR 32 Park & Ride (Fir St)                             | Additional parking capacity at SR 32 Park & Ride at Fir St                              |                         |      | X    |
| Paradise     | Roe Rd Extension (Neal Rd to Skyway)                   | Construct 2 lane roadway for extension of Roe Rd from Neal Rd to Skyway                 |                         |      | X    |
|              |                                                        |                                                                                         |                         |      |      |

## **PUBLIC NOTICE**

### **Notice of Workshop and Public Hearing**

#### **Notice of Workshop: Help Shape the Future of Regional Transportation in Butte County**

**The Butte County Association of Governments invites input on the Draft 2027 Transportation Improvement Program (TIP) and the Draft Transportation-Air Quality Conformity Analysis for the 2027 TIP.**

The [Draft 2027 Transportation Improvement Program \(TIP\)](#) is a funding document that helps implement the policy and investment priorities expressed by the public and adopted by BCAG in the [Regional Transportation Plan / Sustainable Communities Strategy](#), the region's long-range plan. Updated every two years, the TIP reflects the region's near-term transportation investment priorities and helps the largest and most significant projects and programs become a reality. It includes projects that support all modes of travel, such as transit, highways, bridges, local streets and roads, biking, walking and freight movement.

The Draft Transportation-Air Quality Conformity Analysis for the 2027 TIP also is available for public review and comment. The Conformity Analysis demonstrates that both the TIP and the plan comply with federal transportation air quality regulations.

**View and comment on the TIP and the Conformity Analysis  
online at: [www.bcag.org/ftip](http://www.bcag.org/ftip).**

The public comment period will now remain open through 5 p.m., Friday, September 11, 2026.

Written comments will be accepted via the comment form on the TIP webpage via email to [igarcia@bcag.org](mailto:igarcia@bcag.org) and [blasagna@bcag.org](mailto:blasagna@bcag.org) (include "Draft 2027 TIP Comments" in the subject line), or via mail to BCAG, Attn: Draft 2027 TIP Comments, 326 Huss Drive, Suite 150, Chico CA 95928.

***In addition, this notice serves to satisfy the public involvement requirements of the Federal Transit Administration (FTA) annual Program of Projects, for applicable funds.***

A public workshop has been scheduled via zoom to answer questions and discuss any matters concerning the 2027 FTIP and Conformity Analysis. The workshop has been scheduled **for August 12, 2026 from 6 p.m. to 7 p.m.** This will be an open house style workshop with a brief presentation at 6 p.m. The zoom link is posted, [here](#).

## Notice of Public Hearing

The Butte County Association of Governments has scheduled a public hearing to adopt the 2027 FTIP on Thursday, September 24<sup>th</sup> at 9 a.m. Information is also available for review at the Butte County Association of Governments office located at 326 Huss Drive, Suite 150, Chico CA 95928. Questions can be directed to Ivan Garcia, Programming Director at BCAG at 530-809-4616 or by e-mail at [igarcia@bcag.org](mailto:igarcia@bcag.org). Questions can also be directed to Brian Lasagna, Regional Analyst at [blasagna@bcag.org](mailto:blasagna@bcag.org).

1. Introductions
2. Item #1 - ICR Review of BCAG's Draft 2027 FTIP Air Quality Emissions Analysis and Conformity Determination

326 Huss Drive, Suite 150  
Chico, California 95928  
(530) 809-4616 FAX (530) 879-2444

## MEMORANDUM

DATE: August 26, 2026

TO: Interagency Consultation Review Group

FROM: Brian Lasagna, Regional Analyst

### **SUBJECT: ICR Review of BCAG's Draft 2027 FTIP Air Quality Emissions Analysis and Conformity Determination**

**DISCUSSION:** The purpose of this memo is to provide the ICR with the opportunity to comment on BCAG's Draft 2027 Federal Transportation Improvement Program (FTIP) Air Quality Emissions Analysis and Conformity Determination in accordance with the BCAG public participation plan and the federal consultation requirements of 40 CFR 93.105.

Butte County is designated marginal non-attainment under the 2008 federal 8-hour ozone National Ambient Air Quality Standards (NAAQS). Further, Butte County was designated marginal non-attainment under the federal 2015 8-hour ozone NAAQS. Because of these designations, the Butte County Association of Governments (BCAG) is required to perform an air quality conformity determination for the 2027 FTIP.

## REQUESTED ACTION

The ICR is being provided with the opportunity to comment on BCAG's Draft 2027 FTIP Air Quality Emissions Analysis and Conformity Determination and to concur with BCAG's use of the latest planning assumptions as required under 40 CFR 93.110. In addition, the ICR is being asked to concur with changes to four (4) existing projects carried over from the 2025 FTIP.

### **Latest Planning Assumptions**

Planning assumptions have been carried over from the 2024 RTP emissions analysis with changes to account for the latest off-model adjustments approved by US EPA, as described below.

*BCAG used the most current federally approved emissions model to prepare the regional emissions analysis. At the time this document was updated for the 2027 FTIP, July 2026, EMFAC 2021 was the latest federally approved model in California. In addition, two off-model adjustments were included to: 1) remove the estimated emissions benefits attributed to California's Advanced Clean Trucks (ACT), Zero-Emission Airport Shuttle, Heavy-Duty Vehicle and Engine Emission Warranty and Maintenance Provisions (Warranty Phase 1), and Heavy-Duty Omnibus (Omnibus) regulations from EMFAC2021, as approved by US EPA on November 21, 2025, and; 2)*

*account for California's Heavy-Duty Vehicle Inspection and Maintenance Program (HD I/M Program), as approved by the US EPA on February 6, 2026.*

The latest planning assumptions have been summarized and are included in **Attachment #1**.

### **Changes to Existing Exempt Carry-Over Projects**

The following projects have been carried over from the 2025 FTIP with changes to either project title, description, and/or exemption reference.

City of Oroville – Washington Ave. and Table Mountain Complete Streets Project. Project scope has been expanded to include roundabouts. This change includes an update to the exemption reference. The project is exempt from a regional emissions analysis per the Environmental Protection Agency's Transportation Conformity Rule Section 93.127, Table 3. Projects Exempt from Regional Emissions Analysis, indicating that intersection channelization projects are exempt.

Town of Paradise – Go Paradise: Pentz Student Pathway. Project title changed for consistency with Town's bike and pedestrian improvement program.

Town of Paradise – Roe Road Extension Pentz to South Libby – Phase 1 Class II Bike Lanes. Project title and description changed to reflect change in scope from Class I to Class II bike lanes.

Town of Paradise – South Libby to SR 191 / Clark Rd – Phase 2 Class II Bike Lanes. Project title and description changed to reflect change in scope from Class I to Class II bike lanes.

A complete listing of exempt and non-exempt projects has been included in Appendix A and Appendix B of the Draft 2027 FTIP Air Quality Emissions Analysis and Conformity Determination.

### **New Regional Emissions Analysis**

The 2027 FTIP includes no new non-exempt projects. However, new off-model emissions adjustments were approved by US EPA for EMFAC 2021, therefore, a new regional emission analysis and conformity determination are required.

For the proposed action, BCAG states for the record:

1. Non-Exempt Projects: No new non-exempt projects are included in the 2027 FTIP.
2. TCM Implementation: There are no Transportation Control Measures in the approved Carbon Monoxide (CO) SIP and there is no approved Ozone or PM<sub>2.5</sub> SIP applicable to Butte County. Because there are no TCMs in an approved SIP for Butte County, Butte County currently has no TCMs in place and therefore timely TCM implementation requirements do not apply.
3. Financial Constraint: The 2024 RTP and 2027 FTIP has been financially constrained in accordance with the requirements of 40 CFR 93.108 and consistent with the U.S. DOT metropolitan planning regulations (23 CFR Part 450).

4. Interagency and Public Consultation: The following portion applies after all consultation is complete - *for the 2027 FTIP, BCAG initially consulted on this amendment with its Interagency Consultation Review (ICR) group on August 26, 2026. BCAG staff provided a 30-day public review and comment period in compliance with BCAG's adopted Public Participation Plan (PPP). On August 12, 2026, legal notices were posted on the BCAG website. The proposed amendment has been circulated among staff from Federal Highway Administration (FHWA), Environmental Protection Agency (EPA), Federal Transit Agency (FTA), and Caltrans. Appendices contain copies of public notices and responses to public comments.*

## **ADDITIONAL INFORMATION**

### **2027 FTIP Regional Emissions Analysis**

Included for the ICRs information is a copy of the Draft 2027 FTIP Regional Emissions Analysis which includes the listing of all federal and regionally significant projects expected to occur in the non-attainment areas of the BCAG region which have been included in the regional emissions analysis for the 2027 FTIP and 2024 RTP.

### **Schedule**

Included below is the schedule of activities for completing the 2027 FTIP regional emissions analysis and conformity determination.

|                            |                                                                                   |
|----------------------------|-----------------------------------------------------------------------------------|
| <b>August 12, 2026,</b>    | Release Draft 2027 FTIP for 30-day public comment period and hold Public Workshop |
| <b>August 26, 2026,</b>    | BCAG Interagency Consultation Review (15-day period)                              |
| <b>September 11, 2026,</b> | 30-day public review period concludes                                             |
| <b>September 24, 2026,</b> | BCAG Board of Directors considers adoption.                                       |

**STAFF REQUEST:** BCAG staff requests the ICR review and provide comments regarding BCAG's proposed action. In addition, BCAG staff requests that EPA and Caltrans concur with BCAG's proposed action.

## ATTACHEMNT #1

### Summary of Latest Planning Assumptions for the BCAG Conformity Analysis 40 CFR 93.110

| Assumption              | Year and Source of Data<br>(MPO Action)                                                                                                                                                                                    | Modeling                                                                                                                      | Next Scheduled Update                                                                                                                         |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Population              | Base Year: 2022 CA DOF<br>Projections: based on BCAG's <i>Butte County Long-Term Regional Growth Forecasts 2022-2045</i> , prepared March 2023. Modeling utilizes "medium scenario" included in the plan.                  | Included in developing latest BCAG regional transportation model and land use allocations for the years 2025, 2035, and 2045. | Next update to population forecasts is anticipated to be adopted December 2028.                                                               |
| Employment              | Base Year: 2022 CA EDD<br>Projections: based on BCAG's <i>Butte County Long-Term Regional Growth Forecasts 2022-2045</i> , prepared March 2023. Modeling utilizes "medium scenario" included in the plan.                  | Included in developing latest BCAG regional transportation model and land use allocations for the years 2025, 2035, and 2045. | Next update to employment forecasts is anticipated to be adopted December 2028.                                                               |
| Traffic Counts          | Base Year: 2022<br>The transportation model was validated to the base year using year 2022 traffic counts collected by Caltrans, local jurisdictions, and BCAG.                                                            | Latest BCAG regional transportation model was validated using counts.                                                         | Traffic counts are updated every 4 years, depending upon availability of funding.                                                             |
| Vehicle Miles of Travel | The transportation model was validated in 2024 to the 2022 base year.                                                                                                                                                      | Cube is the model used to estimate VMT for the BCAG regional transportation model.                                            | VMT is an output of the transportation model; VMT is affected by the RTP/FTIP project updates and is included in each new emissions analysis. |
| Speeds                  | The transportation model uses industry-standard volume delay curves. Baseline speeds are set according to posted and surveyed speeds and the speeds are sensitive to the amount of traffic on the roadway segments.        | Cube and EMFAC 2021 (v1.0.2)                                                                                                  | Speed data is updated every 4 years, dependent upon availability of funding.                                                                  |
| Vehicle Registration    | EMFAC 2021 was the most recent federally approved model for use in California conformity analysis when the 2024 RTP was developed. Vehicle registration is included by ARB in the model and cannot be updated by the user. | EMFAC 2021 (v1.0.2) with November 21, 2025, adjustment factors and HD I/M Regulation adjustment factors (2/6/2026).           | EMFAC 2021 will be used for any analysis on or after November 15, 2024                                                                        |
| Transit                 | Base Year: Butte Regional Transit (2022) and Butte County Transit and Non-Motorized Plan (2022)<br>Projections: Butte County Transit and Non-Motorized Plan (2022).                                                        | Cube                                                                                                                          | TBD                                                                                                                                           |

## APPENDIX E

### CONFORMITY CHECKLIST

#### Checklist for MPO TIPs/RTPs Checklist Date: September 2023

| 40 CFR              | Criteria                                                                                                                                                                                                                                                                                                                                                                                        | Page                            | Comments       |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|----------------|
| §93.102             | Document the applicable pollutants and precursors for which EPA designates the area as nonattainment or maintenance. Describe the nonattainment or maintenance area and its boundaries.                                                                                                                                                                                                         | p.1-2                           |                |
| §93.102 (b)(2)(iii) | PM10 areas: document whether EPA or state has found VOC and/or NOx to be a significant contributor or if the SIP establishes a budget                                                                                                                                                                                                                                                           |                                 | Not Applicable |
| §93.102 (b)(2)(iv)  | PM2.5 areas: document if both EPA and the state have found that NOx is not a significant contributor to the PM 2.5 nonattainment problem or that the SIP does not establish a budget (otherwise, conformity applies for NOx)                                                                                                                                                                    |                                 | Not Applicable |
| §93.102 (b)(2)(v)   | PM2.5 areas: document if both EPA and the state have found VOC, SO2, and/or NH3 to be a significant contributor or if the SIP establishes a budget                                                                                                                                                                                                                                              |                                 | Not Applicable |
| §93.104 (b, c)      | Document the date that the MPO officially adopted, accepted or approved the TIP/RTP and made a conformity determination. Include a copy of the MPO resolution. Include the date of the last prior conformity finding.                                                                                                                                                                           | Cover Page, Appendix F, and p.1 |                |
| §93.104 (e)         | If the conformity determination is being made to meet the timelines included in this section, document when the new motor vehicle emissions budget was approved or found adequate.                                                                                                                                                                                                              |                                 | Not Applicable |
| §93.106             | If the metropolitan planning area is in a serious, severe, or extreme ozone nonattainment area and/or serious carbon monoxide nonattainment area and contains an urbanized population over 200,000, then RTP must specifically describe the transportation system envisioned for future years called "horizon years."                                                                           |                                 | Not Applicable |
| §93.106 (a)(2)ii    | Describe the regionally significant additions or modifications to the existing transportation network that are expected to be open to traffic in each analysis year. Document that the design concept and scope of projects allow adequate model representation to determine intersections with regionally significant facilities, route options, travel times, transit ridership and land use. | p.4-7<br>p.10-11<br>Tables 3-5  |                |
| §93.108             | Document that the TIP/RTP is financially constrained (23 CFR 450).                                                                                                                                                                                                                                                                                                                              | p.8                             |                |
| §93.109 (a, b)      | Document that the TIP/RTP complies with any applicable conformity requirements of air quality implementation plans (SIPs) and court orders.                                                                                                                                                                                                                                                     | p.13                            |                |
| §93.109 (c-k)       | Provide either a table or text description that details, for each pollutant and precursor, whether the interim emissions tests and/or the budget test apply for conformity. Indicate which emissions budgets have been found adequate by EPA, and which budgets are currently applicable for what analysis years.                                                                               | p.12-13                         |                |
| §93.109 (e)         | Document if the area has a limited maintenance plan and from where that information is found                                                                                                                                                                                                                                                                                                    | p.2                             |                |
| §93.109 (f)         | Document if motor vehicle emissions are an insignificant contributor and in what SIP that determination is found                                                                                                                                                                                                                                                                                | p.2                             |                |
| §93.110 (a, b)      | Document the use of latest planning assumptions (source and year) at the "time the conformity analysis begins," including current and future population, employment, travel and congestion. Document the use of the most recent available vehicle registration data. Document the date upon which the                                                                                           | p. 3-7<br>Table 1               |                |

| 40 CFR               | Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                    | Page             | Comments |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|----------|
|                      | conformity analysis was begun.                                                                                                                                                                                                                                                                                                                                                                                                              |                  |          |
| USDOT/EPA guidance   | Documents planning assumptions are less than 5 years old at the time the conformity analysis begins. If assumptions are older than 5 years documents justification for not reviewing and updating assumptions at least every 5 years.                                                                                                                                                                                                       | p.5, 7, & 8      |          |
| §93.110 (c,d,e,f)    | Document any changes in transit operating policies and assumed ridership levels since the previous conformity determination. Document the use of the latest transit fares and road and bridge tolls. Document the use of the latest information on the effectiveness of TCMs and other SIP measures that have been implemented. Document the key assumptions and show that they were agreed to through Interagency and public consultation. | p.5, 8, & 9      | No TCMs  |
| §93.111              | Document the use of the latest emissions model approved by EPA.                                                                                                                                                                                                                                                                                                                                                                             | p.9              |          |
| §93.112              | Document fulfillment of the interagency and public consultation requirements outlined in a specific implementation plan according to §51.390 or, if a SIP revision has not been completed, according to §93.105 and 23 CFR 450. Include documentation of consultation on conformity tests and methodologies as well as responses to written comments.                                                                                       | p.8              |          |
| §93.113              | Document timely implementation of all TCMs in approved SIPs. Document that implementation is consistent with schedules in the applicable SIP and document whether anything interferes with timely implementation. Document any delayed TCMs in the applicable SIP and describe the measures being taken to overcome obstacles to implementation.                                                                                            | p.8              | No TCMs  |
| §93.114              | Document that the conformity analyses performed for the TIP is consistent with the analysis performed for the Plan, in accordance with 23 CFR 450.324(f)(2).                                                                                                                                                                                                                                                                                | p.1              |          |
| §93.115              | Describe how the projects come from a conforming RTP and TIP. If this criterion is not satisfied, the project must satisfy all criteria in Table 1 of §93.109(b) for a project not from a RTP and TIP.                                                                                                                                                                                                                                      | p.10             |          |
| §93.118 (a, c, e)    | <u>For areas with SIP budgets:</u> Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with any adequate or approved motor vehicle emissions budget for all pollutants and precursors in applicable SIPs.                                    | p.12             |          |
| §93.118 (b)          | Document for which years consistency with motor vehicle emissions budgets must be shown.                                                                                                                                                                                                                                                                                                                                                    | p.10             |          |
| §93.118 (c)          | Document and demonstrate consistency with motor vehicle emissions budgets for each pollutant or pollutant precursor for which the area is in nonattainment or maintenance and for which the applicable SIP plan establishes a motor vehicle emissions budget.                                                                                                                                                                               | p.1-2<br>p.12-13 |          |
| §93.118 (d)          | Document the use of the appropriate analysis years in the regional emissions analysis for areas with SIP budgets, and the analysis results for these years. Document any interpolation performed to meet tests for years in which specific analysis is not required.                                                                                                                                                                        | p.10             |          |
| §93.119 <sup>1</sup> | <u>For areas without applicable SIP budgets:</u> Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with the requirements of the “Action/Baseline”, “Action/1990” and/or “Action/2002” interim emissions tests as applicable.               | N/A              | No SIPs  |
| §93.119              | Document the use of the appropriate analysis years in the regional emissions                                                                                                                                                                                                                                                                                                                                                                | p.12-13          |          |

| <b>40 CFR</b>                    | <b>Criteria</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | <b>Page</b>              | <b>Comments</b> |

| (g)                              | analysis for areas without applicable SIP budgets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                          |                 |
| §93.119 (e)                      | Document the appropriate baseline year.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | p.10                     |                 |
| §93.119 (f)                      | Document the use of appropriate pollutants and if EPA or the state has made a finding that a particular precursor or component of PM10 is significant or insignificant.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | p.1-2                    | Not Applicable  |
| §93.119(g)                       | For areas without applicable SIP budgets: Document the use of the appropriate analysis years in the regional emissions analysis for areas without applicable SIP budgets. The regional emissions analysis must be performed for analysis years that are no more than ten years apart. The first analysis year must be no more than five years beyond the year in which the conformity determination is being made. The last year of the timeframe of the conformity determination (as described under §93.106(d)) must also be an analysis year.                                                                                                                                                             | p.1-2<br>p.10<br>p.12-13 |                 |
| §93.119 (h,i)                    | Document how the baseline and action scenarios are defined for each analysis year.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | p.12-13                  |                 |
| §93.122 (a)(1)                   | Document that all regionally significant federal and non-Federal projects in the nonattainment/maintenance area are explicitly modeled in the regional emissions analysis. For each project, identify by which analysis it will be open to traffic. Document that VMT for non-regionally significant Federal projects is accounted for in the regional emissions analysis                                                                                                                                                                                                                                                                                                                                    | p.10-11                  |                 |
| §93.122 (a)(2, 3)                | Document that only emission reduction credits from TCMs on schedule have been included, or that partial credit has been taken for partially implemented TCMs. Document that the regional emissions analysis only includes emissions credit for projects, programs, or activities that require regulatory action if: the regulatory action has been adopted; the project, program, activity or a written commitment is included in the SIP; EPA has approved an opt-in to the program, EPA has promulgated the program, or the Clean Air Act requires the program (indicate applicable date). Discuss the implementation status of these programs and the associated emissions credit for each analysis year. | p.8                      | No TCMs         |
| §93.122 (a)(4,5,6,7)             | For nonregulatory measures that are not included in the STIP, include written commitments from appropriate agencies. Document that assumptions for measures outside the transportation system (e.g. fuels measures) are the same for baseline and action scenarios. Document that factors such as ambient temperature are consistent with those used in the SIP unless modified through interagency consultation. Document the method(s) used to estimate VMT on off-network roadways within the urban transportation planning area, and on roadways outside the urban transportation planning area.                                                                                                         | p.9                      |                 |
| §93.122 (b)(1)(i) <sup>2</sup>   | Document that a network-based travel model is in use that is validated against observed counts for a base year no more than 10 years before the date of the conformity determination. Document that the model results have been analyzed for reasonableness and compared to historical trends and explain any significant differences between past trends and forecasts (for per capita vehicle-trips, VMT, trip lengths mode shares, time of day, etc.).                                                                                                                                                                                                                                                    | p.4-7                    |                 |
| §93.122 (b)(1)(ii) <sup>2</sup>  | Document the land use, population, employment, and other network-based travel model assumptions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | p.4-7                    |                 |
| §93.122 (b)(1)(iii) <sup>2</sup> | Document how land use development scenarios are consistent with future transportation system alternatives, and the reasonable distribution of employment and residences for each alternative.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | p.4-7                    |                 |
| §93.122                          | Document use of capacity sensitive assignment methodology and emissions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | p.4-7                    |                 |

| 40 CFR                             | Criteria                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Page                 | Comments       |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|----------------|
| (b)(1)(iv) <sup>2</sup>            | estimates based on a methodology that differentiates between peak and off-peak volumes and speeds, and bases speeds on final assigned volumes.                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                      |                |
| §93.122<br>(b)(1)(v) <sup>2</sup>  | Document the use of zone-to-zone travel impedances to distribute trips in reasonable agreement with the travel times estimated from final assigned traffic volumes. Where transit is a significant factor, document that zone-to-zone travel impedances used to distribute trips are used to model mode split.                                                                                                                                                                                                                                                                                         | p.4-7                |                |
| §93.122<br>(b)(1)(vi) <sup>2</sup> | Document how travel models are reasonably sensitive to changes in time, cost, and other factors affecting travel choices.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | p.4-7                |                |
| §93.122<br>(b)(2) <sup>2</sup>     | Document that reasonable methods were used to estimate traffic speeds and delays in a manner sensitive to the estimated volume of travel on each roadway segment represented in the travel model.                                                                                                                                                                                                                                                                                                                                                                                                      | p.4-7                |                |
| §93.122<br>(b)(3) <sup>2</sup>     | Document the use of HPMS, or a locally developed count-based program or procedures that have been chosen through the consultation process, to reconcile and calibrate the network-based travel model estimates of VMT.                                                                                                                                                                                                                                                                                                                                                                                 | p.4-7                |                |
| §93.122<br>(d)                     | In areas not subject to §93.122(b), document the continued use of modeling techniques or the use of appropriate alternative techniques to estimate vehicle miles traveled                                                                                                                                                                                                                                                                                                                                                                                                                              | p.4-7                |                |
| §93.122<br>(e, f)                  | Document, in areas where a SIP identifies construction related PM10 or PM 2.5 as significant pollutants, the inclusion of PM10 and/or PM 2.5 construction emissions in the conformity analysis.                                                                                                                                                                                                                                                                                                                                                                                                        |                      | Not Applicable |
| §93.122<br>(g)                     | If appropriate, document that the conformity determination relies on a previous regional emissions analysis and is consistent with that analysis.                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                      | Not Applicable |
| §93.124                            | Document if there are subarea budgets established, and for which areas (93.124(c)). Document if there is a safety margin established, and what are the budgets with the safety margin included (93.124(a)). Document if there has been any trading among budgets, and if so, which SIP establishes the trading mechanism, and how it is used in the conformity analysis (93.124(b)). If there is more than one MPO in the area, document whether separate budgets are established for each MPO (93.124(d)). The previous regional emissions analysis meets 93.118 or 93.119 as applicable ((g)(1)(iv)) |                      | Not Applicable |
| §93.126,<br>§93.127,<br>§93.128    | Document all projects in the TIP/RTP that are exempt from conformity requirements or exempt from the regional emissions analysis. Indicate the reason for the exemption (Table 2, Table 3, traffic signal synchronization) and that the interagency consultation process found these projects to have no potentially adverse emissions impacts.                                                                                                                                                                                                                                                        | p.8<br>Appendix<br>A |                |

Note that some areas are required to complete both interim emissions tests.

<sup>2</sup> 40 CFR 93.122(b) refers only to serious, severe, and extreme ozone areas and serious CO areas above 200,000 population.

**Disclaimers:** This checklist is intended solely as an informational guideline to be used in reviewing Transportation Plans and Transportation Improvement Programs for adequacy of their conformity documentation. It is in no way intended to replace or supersede the Transportation Conformity regulations of 40 CFR Parts 51 and 93, the Statewide and Metropolitan Planning Regulations of 23 CFR Part 450 or any other EPA, FHWA or FTA guidance pertaining to transportation conformity or statewide and metropolitan planning. This checklist is not intended for use in documenting transportation conformity for individual transportation projects in nonattainment or maintenance areas. 40 CFR Parts 51 and 93 contain additional criteria for project-level conformity determinations.

RESOLUTION NO 2026/2027-01

---

**ADOPTION OF THE 2027 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM (FTIP) AND AIR QUALITY CONFORMITY DETERMINATION FOR BUTTE COUNTY**

**WHEREAS**, the Butte County Association of Governments is the designated Metropolitan Planning Organization for Butte County in accordance with 23 USC 134(b)(6); and Section 450.306 of the Metropolitan and Statewide Planning Rule;

**WHEREAS**, the Infrastructure Investment and Jobs Act (IIJA) (Public Law 117-58, also known as the “Bipartisan Infrastructure Law”) into law on November 15, 2021 requires the Butte County Association of Governments, as the Metropolitan Planning Organization, to prepare a Transportation Improvement Program in cooperation with the State and transit operators, to include all projects to be funded under Title 23 and the Federal Transit Administration grants; and requires BCAG to prepare a long-range Regional Transportation Plan / Sustainable Communities Strategy (RTP/SCS) and short-range Federal Transportation Improvement Program (FTIP);

**WHEREAS**, the 2027 FTIP is consistent with the metropolitan transportation planning regulations pursuant to Title 23 Code of Federal Regulations Section 450, Title 23, United States Code Section 134, and Title 49 United States Code Section 5303;

**WHEREAS**, the 2027 FTIP is consistent with the transportation system described in the current 2024 RTP/SCS;

**WHEREAS**, the 2027 FTIP is financially constrained by year and includes a financial plan that demonstrates which projects can be implemented using committed funds and affirms the availability of funding;

**WHEREAS**, the 2027 FTIP includes all regionally significant projects to be funded from local, state, or federal resources;

**WHEREAS**, projects in the 2027 FTIP satisfy the transportation conformity provisions of 40 CFR 93.122(g) and all applicable transportation planning requirements per 23 CFR Part 450 including the establishment of federal performance management targets for safety, pavement and bridge conditions, reliability and congestion, and transit assets and safety in the planning region;

**WHEREAS**, The results from the 2027 FTIP and 2024 RTP emissions analysis show that current and future emissions of the ozone precursors ROG and NOx will be no greater than the 2011 and 2017 base year emissions levels. Thus, Butte County, in accordance with the Transportation Conformity Rule requirements applicable to Butte County (§51.464 and §51.436 – 51.440), has satisfied the “no-greater-than-2011” test for the 2008 8-hour federal ozone NAAQS and the “no-greater-than-2017” test for the 2015 8-hour federal ozone NAAQS. Based on this analysis, the 2024 Regional Transportation Plan (RTP) and 2027 Federal Transportation Improvement Program (FTIP) conform to the applicable State Implementation Plan (SIP) and all applicable sections of the EPA’s Transportation Conformity Rule;

**WHEREAS**, Butte County does not have any required Transportation Control Measures in the State Implementation Plan;

**WHEREAS**, the 2027 FTIP satisfies the requirements by the Federal Transit Administration for the “Programming of Projects” (POP);

**WHEREAS**, BCAG developed the 2027 FTIP and Air Quality Conformity Determination in accordance with the adopted Public Participation Plan;

**NOW THEREFORE BE IT RESOLVED** that the Butte County Association of Governments hereby adopts the 2027 Federal Transportation Improvement Program and Air Quality Conformity Determination;

**BE IT FURTHER RESOLVED** that BCAG staff is hereby directed and authorized to work with the California Department of Transportation, the Federal Highway Administration, the Federal Transit Administration, and the Environmental Protection Agency to make any necessary changes or corrections that may be needed to ensure the timely delivery of the FTIP to obtain its approval;

**BE IT FURTHER RESOLVED** that the BCAG Board authorizes its staff to administratively modify or amend the 2027 FTIP as outlined in the procedures defined in the FTIP in accordance with BCAG’s Public Participation Process (PPP).

**PASSED AND ADOPTED** by the Butte County Association of Governments on the 24<sup>th</sup> day of September 2026 by the following vote:

AYES: Connelly, Durfee, Ritter, Himmelshue, Goldstein,  
Johnson, Pittman, Lassonde
